TERMS

FragTag products are protected by both Australian Copyright Law and international copyright treaties. You may not separately publish, market, distribute, sell or sublicense, for fee or no fee, the Licensed Product or any part thereof.

FragTag will endeavour to provide free access to software updates to all purchased products that are still currently in development. The distribution method of these updates is at the sole discretion of FragTag, and for security reasons product updates may involve returning electronic components to FragTag or a licensed distributor. In this instance return postage costs may be payable by the purchaser.

WARRANTY

FragTag warrants that your purchased product will perform substantially in accordance with the provided documentation for a period of 12 months from the date of receipt. In the event of deviations in the product, FragTag will make a reasonable effort to bring the product into conformance with the documentation to provide you with a corrected version as soon as possible.

This warranty is void if the product failure has resulted from abuse, accident, or misapplication. FragTag's liability is limited to refund of the money paid for the product, and in no event will FragTag be liable for any indirect or consequential damages that may arise (including damages for loss of business profits, business information, or other pecuniary losses).

Install Guide

To install HQ-SFX into a FragTag mainboard, carefully remove the existing sound chip, if needed. This is best achieved using an IC Extraction tool.

Next, carefully insert HQ-SFX into the Mainboard socket marked "IC2." Observe the orientation of HQ-SFX, ensuring that silver metal can sits to the left hand side. Refer to the photos below.

Note that inserting HQ-SFX in the wrong direction will result in malfunction, and may damage the device.

Caution: Ensure that no metal parts of your gun casing contact with any part of HQ-SFX. Failure to do so may result in a short circuit that damages the board, and will not be covered under warranty.

Note that the HQ-SFX module is approximately 6mm higher than the previous generation ISD2560 sound chip. Ensure your casing has adequate clearance for the extra height.
